MEMORANDUM FOR: Chief of Staff/OEL

THROUGH : Chief/EECB/OPD  
Chief/OPD/OEL

SUBJECT : Preliminary Report on Radar Sites Along  
the Coast of China

1. Attached are 21 folders describing radar targets along the Coast of China. These targets were selected by a weighting of the following factors: importance of the target; probable accessibility of the target; and ability to locate the target. For this reason the SA-2 sites were included though they are some distance from the coast; some CROSS SLOTS were chosen because it appears they might be relatively easy to reach.

2. Precise locations of the sites poses the biggest problem. At this date the SA-2 sites, the cruise missile sites, and the radars at targets #20 and 21 can be located. NPIC has done a search of TKH, CHURCH DOOR, and [REDACTED] photography covering the coordinates and surrounding area of the first 19 targets. The results of this search have not yet been delivered, but should arrive by 5 August. They will be held for me by [REDACTED] in room 3F28 when they arrive. You may want to pick them up for your perusal while I am on leave. [REDACTED] photos were ordered for targets #20 and 21.

3. There is a general file in my safe which may be of interest to you. There is also a PACOM ROB plotted on ONC charts in the vault, the collateral material is in my safe.

4. Final recommendation of targets has not yet been attempted, since the availability of photography is of considerable weight. When we see what NPIC produces we should be able to narrow down the targets to a few, and then we can exhaust all sources on those few.
